

Ornamental fish

This ornamental fish farm is very famous in Sri Lanka for quality products, which are exported to Europe, America and Japan. The farm located near Colombo, has also won many awards from the Government for quality exports.

The farm raises some 100 varieties of ornamental fish. He began using EM in 2009 as a test project, where he mixes EM 1 with his feed at a rate of 10 ml of EM1 to 500 mg of feed before feeding. This has reduced the incidence of disease and improved the health of the fish.

He does not apply EM to the water, but will test this process gradually using test tanks.

Nearly 100 species of ornamental fish are raised by the company.

The company began using EM in 2009.

Mix feed with EM original solution. 500mg/10ml

Apply EM feed into the water.
